# BALE WRAPPER

## Z 550

The machine is designed for wrapping compressed bales of grass, hay and legumes with humidity around 60% by stretchable and self-adhesive polyethylene foil with a width of 500 or 750 mm. Bales of plant material are formed in the shape of a cylinder using balers. They can not exceed a width of 1400 mm and a diameter of 1600 mm. Maximum total weight of bale is 1000 kg. During operation wrapper must be placed on a firm, level surface, ensuring sufficient stability of the machine.

The bale wrapper is made up of:

- The fixed frame,
- The tipping frame,
- The rotary table with two rollers - powered by a hydraulic motor,
- The foil feeder,
- A set of covers.

BALE WRAPPER Z550	Measurement unit	Manufacturer: PPUH POMAROL S.A. 11-300 Biskupiec
Type		Z 550
Way to aggregate		Suspended
Dimensions:		
Length	mm	2580
Width	mm	1120
Height	mm	1820
Machine mass	kg	500
Maximum total weight of bale	kg	1000
Dimension of wrapped bale:		
Length	mm	to 1400
Diameter	mm	1000÷1200
Maximum transport speed	km/h	20
The demand for power	kW	min. 30
The hydraulic system required pressure	MPa	12
Recommended tractor pump performance	liters per minute	22
Automatic loading		NO
Automatic unloading		YES
Foil width	mm	500 or 750
Minimal bale wrapping time	minutes	around 2
Operating personnel		1 person
