# RAKE AND TEDDER Z-518

The Rake and Tedder Z-518 is intended for tedding and raking grasses and short-stem green forages on arable fields and meadows of a levelled surface and a slope not exceeding 12 degrees. The best results are achieved by raking pre-dried green forage or hay to form ballots, as it shapes a loose roll with an uniform cross section.

Due to such a solution, it is possible to get the maximal output of the picking up machines.
