FRONTAL DOZER T201

The Frontal Dozer is a device made of a simple pushing assembly attached on the tractor front.

It is particularly useful in the through-cowsheds to remove the dung.

Because of applying a hydraulic cylinder to control the height of the pushing blade and the possibility to adjust the turn angle of the pushing blade it is an excellent tool for such works as:

- pushing and levelling soil heaps and other loose materials,
- removing snow, from roads, sidewalks, alleys and squares,
- different cleaning works.

Technical data:

T201

Working width	2200 mm
Length	1300 mm
Lifting height	500 mm
Dropping depth	250 mm
Weight	320 kg
Turning angle	17°
Cooperation tractor	Ursus, Zetor, Belarus, MTZ, New Holland, Lamborghini, Escort, Farmtrac, Case, John Deere, Deutz Farm, Same and other. Tractors from different manufacturers: see list above. Detailed list of tractors manufacturers available at the scraper manufacturer.
